PayWatch

Watch your money grow.

A private financial CFO in your pocket — one score, one plan, one AI advisor.

Investor / mentor brief · [Date]

THE PROBLEM

Managing money in India is broken.

- A person’s finances are scattered across 8–10 apps — bank, UPI, mutual funds, insurance, tax portals — with no single view.
- They see data everywhere, but get no guidance on what to actually do next.
- Real advice (a CA or planner) is expensive, intimidating, or out of reach — so most people go without.
- The result: they under-invest, stay under-insured, overpay tax, and lose years of compounding to inaction.

Hundreds of millions of young, first-time earners are entering the formal economy with no one guiding their money.

THE SOLUTION

A private financial CFO in your pocket.

PayWatch unifies your entire financial life and tells you exactly what to do next — in plain, beginner-friendly language.

Money Health Score

Your whole financial life as one number, across six dimensions — savings, insurance, diversification, emergency fund, debt and tax.

Action plan

A prioritised list of steps, quantified in rupees and with deadlines. Do an action, watch your score move.

Ask PayWatch

An AI advisor that answers in plain English using your own numbers — not generic tips.

HOW IT WORKS

Connect → Understand → Act.

1

Connect

Add your finances by uploading documents (statements, payslips, Form 16) or entering details — no bank passwords, ever.

2

Understand

We compute your Money Health Score and a full picture of income, tax, insurance and investments.

3

Act

You get a clear, rupee-quantified action plan — and can ask the AI advisor anything, any time.

THE PRODUCT

One app, the whole picture.

Money Health Score

Six dimensions, one clear number, tracked over time.

Ask PayWatch (AI)

Answers grounded in your real numbers; scope-guarded.

Tax

Full computation across all income heads + guided ITR filing.

Insurance

Needs discovery, comparison, and policy tracking.

Investing

Category-level guidance + portfolio look-through.

Everyday tools

Alerts, monthly briefings, spending scan, document vault.

TRUST & DATA SECURITY

Your money data is sensitive — we treat it that way.

The concern

People are right to hesitate before sharing income and bank data. Winning that trust is the whole game — so it is designed in from day one.

- No bank passwords, ever — login is a simple mobile OTP.
- You choose what to share — start with manual entry or document upload; nothing is forced.
- Bank-grade security — encrypted in transit and at rest (AES-256).
- Stored in India (Mumbai), aligned with the DPDP Act; export or delete anytime.
- Live bank sync (later) only via RBI's regulated Account Aggregator — consent-based, revocable, still no passwords.

We earn trust by giving useful guidance with minimal data first — users share more as they see the value.

WHY NOW

A massive, underserved, digitising market.

- 500M+ working Indians, plus a fast-growing base of young, digital-first earners and students.
- Financial products are booming (UPI, demat accounts, insurance) — but guidance has not kept up.
- Existing apps assume you already know what to do; beginners and the mass market are underserved.
- Digital India and rising financial awareness make this the moment to build the guidance layer.

COMPETITIVE LANDSCAPE

Crowded market — but no one connects the dots.

Expense trackers

Walnut, Money View, Cred — Show spending. No plan.

Tax tools

ClearTax, Quicko — Tax filing only.

Insurance

PolicyBazaar, Ditto — Insurance only.

Investing

Groww, Zerodha, INDmoney — Investing-led; INDmoney aggregates but doesn't give a plan.

Where we stand out

PayWatch is the only one that unifies all of it and adds a guidance layer — one score, one plan, one AI advisor — built for beginners, education-first, never product-pushing.

WHY WE WIN

Why this holds up under scrutiny.

- The hard, valuable part is guidance — turning messy data into “do this next.” Data is commoditised; judgment isn’t.
- Unification is a structural moat — incumbents each own one silo and won’t cannibalise it (a tax app won’t push insurance; a broker won’t tell you to hold cash).
- Our AI advisor improves with every user and interaction, grounded in real financial data.
- Education-first, no product-pushing — builds trust and loyalty in an under-served beginner segment.
- Multiple revenue lines (subscription + insurance + mutual-fund distribution) once partnered — resilient economics.
- Honest on risk: a big player could attempt this — but it cuts against their single-product incentives, and the beginner-guidance niche is wide open.

BUSINESS MODEL

Freemium subscription + distribution.

Free

₹0

The hook — Money Health Score + a taste.

Starter

₹199 / mo

Full score, insights, tax prep, guidance.

CFO

₹499 / mo

Everything, unlimited — the full CFO.

- Plus commission from insurance and mutual-fund distribution, via licensed partners.
- Software economics — near-zero marginal cost per user; margins grow with scale.
- Low customer-acquisition cost through organic and campus channels.

WHERE WE ARE

A complete, working product.

- Fully functional app, end to end — live on web and mobile (Android & iOS).
- The entire feature set is built — score, AI advisor, tax, insurance and investing.
- Incubated at the MAHE Innovation Centre.
- Prototype stage — Technology Readiness Level 7.
- Next: validate with real users, formalise the company, and prepare for commercial launch.

PATH TO COMMERCIAL LAUNCH

Partner-first, licence-later.

1. **Now**

   Working product — validate demand with real users.

2. **Partnerships**

   Insurance via a licensed embedded partner (e.g. Zopper / Riskcovry); investing via an AMFI mutual-fund distributor (ARN) + BSE StAR MF.

3. **Licenses & registrations**

   Incorporate the company; ERI for one-click ITR e-filing; DPDP compliance; Razorpay live; Account Aggregator (FIU) for bank sync.

4. **Scale**

   Grow users, turn on revenue, raise funding.

TEAM

Built solo — now building a team.

- Yash Saini — founder. Built the entire product end to end: web, mobile, backend, AI integration and the tax / score / insurance engines.
- Now onboarding student interns across marketing, research, product and outreach, with Innovation Centre support.
- Mentored and incubated at the MAHE Innovation Centre.

OUR VISION

Financial clarity for every Indian.

Not just for those who can afford an advisor — for everyone.

The ask

- Mentorship and a place in an accelerator / incubation programme.
- Introductions to licensed partners — insurance and mutual-fund distribution.
- Help reaching early users to validate demand.

PayWatch

Watch your money grow.
